

EFD is used for monitoring flow in process lines. Must be careful to choose a model which is compatible with liquid characteristics in line. It is available for monitoring from both of side. As optional, flow switch can be assembled in the body.

To warrant its vigorously working should be used a filter in the line.
Can be manufacturing according to customers need
(for different pressure range and different mounting types, etc.).

EFD FLOW DISPLAY

EFD 10
EFD 20
EFD 30

Application Areas :

Hot/Cold water , steam , compressed air
Fuel Oil , Pharmaceutical and Food Industry
Other fluids ...

Technical Specifications :

Body Material	304 Stainless Steel
Optional	316 Stainless Steel
Monitoring Material	Tempered Glass
	Double Glass
Seal Material	Klingrid (std)
Optional	PTFE or Spiral wound
Max. Working Temperature	200 °C
Optional	300 °C
Max. Working Pressure	16 bar
Optional	40 bar
